

## FEAM WG Market Products

**States that contributed to the determination of market products: DE, IL, MD, NJ, PA**

1.	What Products would your state be interested in procuring through the FEAM?	<i>Consensus for Market Design</i>
	a. <b>Existing State-Defined products.</b> Please indicate preference for this product and list which of your state's existing products you would like to include in the market (i.e. Class I REC)	1. DE Solar Carve out product 2. NJ Class I REC 3. PA Tier I AEPS Credits 4. Tier I AEPS Solar PV Credits (PA) 5. Tier II AEPS Credits (PA) 6. IL in-state requirement (or locational component on Regional REC)
	b. <b>Regional REC product.</b> Please indicate preference for a regional REC to be included in the market, even of only as an option for voluntary demand to purchase. Please indicate any technology preference (i.e. PJM wind/solar REC).	Tier I Regional REC (wind/solar produced within PJM)  Tier II Regional REC (7 remaining renewable sources as defined in DE Statute: 26 Del. C §352.7)
	c. <b>Clean Energy Attribute Credit.</b> Please indicate preference for a regional CEAC-like product to allow attributes from clean, but not renewable, resources to be procured. Please indicate any technology preference (i.e. nuclear/storage CEAC).	CEAC (nuclear)
	d. <b>GHG Abatement Tracking product.</b> Please indicate whether there is desire to develop a new tracking mechanism to have a product denoted in GHG abatement levels, or tracking GHG abatement value of products a-c.	GHG Abatement product development should begin, but not for inclusion in the market in initial years.
2.	Are there any other products that should be considered in the market that are not listed in A-D above? If yes, please describe the product.	Potential OSW specific product to be developed in future.
3.	Do you envision the FEAM procurement to assist with RPS or CES compliance?	Must be able to work alongside existing REC procurement processes
3A.	If yes, do you want to maintain the ability for REC to be traded in the spot-market or existing REC market used by your state?	Must be able to work alongside existing REC procurement processes
3B.	If yes, do you envision the FEAM replacing some or all of your state's existing REC procurement methods over time?	Unclear at this time.
